MANAGING DIRECTOR
A. D. Hinckley

TECHNICAL DIRECTOR
C. L. Crouch

In Two Sections—Section I

These indexes cover the text of the 12 issues of ILLUMINATING ENGINEERING for the calendar year of 1963.

1. **Subject Index**
   Index by title and subject of all papers, discussions, data sheets, technical committee reports and general articles.
2. **Author Index**
3. **Lighting News**—Subject Index.

Page Numbers by Issues

January	1-45
February	47-105
March	107-158
April Section I	159-293
Section II	295-336
May	337-395
June	397-464
July	465-522
August	523-562
September	563-613
October	615-647
November	649-705
December	707-765

STATEMENTS and opinions expressed in articles and papers in ILLUMINATING ENGINEERING shall be considered the expressions of contributors and shall not necessarily represent the policies or opinions of the Society. Advertisements appearing in ILLUMINATING ENGINEERING are the sole responsibility of the advertiser. Official Society opinions will be expressed only in official reports specifically approved by Council, and in the 'IES Lighting Handbook.'

Copyright 1963 by the Illuminating Engineering Society. Published monthly in the United States of America. Second-class postage paid at Baltimore, Md. Nonmember subscription $18 per year plus extra postage to all countries to which second-class postage rates do not apply; single copies $1.50. Address changes must be received at IES Headquarters, 345 East 47th Street, New York 17, N. Y., by the first of the month to be effective with the issue of the next succeeding month. IE is indexed regularly by Engineering Index, Inc., and is available on microfilm from University Microfilms, Ann Arbor, Mich.

1. Subject Index

A

A 35-kva Semiconductor High-Frequency Fluorescent Lighting Power Supply (abstract) 603
Accent on Outdoor Living 310
Accurate Maintenance Factors 124
Adapting Old Areas to Modern Needs 526
Additives to Mercury Discharge, Higher Efficiency Light Source Through Use of 434
Air Handling
  Design and Evaluation of Dynamically Integrated Lighting-Air Conditioning Systems 75
  Effect of Radiant Ceilings on Fluorescent Ballast Operation 62
  Hot/Cold 342
  Method of Determining Energy Distribution Characteristics of Fluorescent Luminaires 69
  Office Comfort 536
  Optimization of Air Flows in Combined Luminaire Air-Handling Equipment 39
Applied Lighting Competition Entries
  Accent on Outdoor Living 310
  Adapting Old Areas to Modern Needs 526
  Architect's Home 47
  Ballroom Marks Downtown Renewal 619
  Budget Lighting for Shopping Center Parking 307
  Church Relighting—on a Low Budget 344
  Climate-Controlled Windowless Plant 308
  Cove for a Tent-Type Church 20
  Custom-Designed Lighting with Standard Equipment 296
  Doughnuts to Dollars 304
  Dual Purpose—Lighting and Demonstration 300
  Economic Floodlighting with Mercury Source 55
  Flight Apron, Oakland International Airport 624
  Forward-Looking Market Lighting 472
  Gothic Highlighting 340
  Heating a Kitchen with Lighting 626
  Home Personalized with Light 658
  Hospital Overbed Lighting 25
  Hot/Cold Air Handling 342
  Houston's National Bank of Commerce 54
  IES Hall 538
  Illuminating Engineering Aspects of Detroit's 'Gas Building' 655
  Improving a "Recommended Practice" Installation 302
  Indirect Technique in a Church 650
  Individualizing a Home with Garden Lighting 529
  Integrated Ceiling Turns Warehouse into Modern Office 618
  Kiewit Plaza, Omaha 465
  Kitchens, Five 111
  Light—an Architectural Element 707
  Lighting on Display 629
  Lighting Remodels a Department Store 299
  Modern Environmental Ideas in an Old Classroom 22
  New Image for a Newspaper Office 722
  New Outlook in an Old Home 480
  Nighttime Impact 474
  Oakland International Airport 523
  Office Comfort 536
  One Step Ahead in Classroom Lighting 617
  Optics Turned to Profit in Money Museum 712
  Outdoor Canopied Rink 118
  Portable Arrangements for Altar Lighting 623
  Press Room Lighting 297
  Quality Lighting for a Quality Product 621
  Quartz Applications 633
  Quartz-Iodine Goes to Church 636
  Quartz Teams with Mercury in a Bank 635
  Reclaimed Space 18
  Relighted Bus Terminal 27
  Remodeled Milwaukee Bank 50
  San Bernardino Business Men's Association Building 639
  Skylight/Luminaires in a Classroom 60
  Solving a Load Problem 301
  Structural Lighting 718
  Tabor Academy–Marion, Mass. 118
  Tailored for a Contemporary Home 337
  Tent-Type Church 57
  Trapezoidal Office 533
  Vertical Lighting from an Indirect Cove 715
  Windowless Basilica 58
Analysis of Reflected Glare and Visual Effect from Windows (abstract) 583
Application and Economics of Advanced Electrical Space Conditioning (abstract) 594
Arc Lamps, 5-kw Compact, Control and Application of 457
Architect's Home 47
(Architectural) Light—an Architectural Element 707
Artificial Daylight 664
(Aviation) Oakland International Airport 523; 624

B

Ballast Circuitry and Line Voltage Variations, Effect of on Mercury Lamp Stability 447
Ballast Operation, Effect of Radiant Ceilings on Fluorescent 62
Ballroom Marks Downtown Renewal 619
Ballrooms—Reclaimed Space 18
Banks
  Bank in the Round 533
  Bankers Trust, New York 52
  Fairbury, Illinois 53
  Houston's National 54
  Quartz Teams with Mercury 635
  Milwaukee Bank Remodeled 50
Basic Impulse Insulation Levels of Mercury Lamp Ballasts for Outdoor Applications (abstract) 575
Biography of J. Dixon Mitchell 615
Bowling—Solving a Load Problem 301
Budget Lighting for Shopping Center Parking 307
Building and Sidewalk, Floodlighting a 433
Bus Terminal, Relighted 27

C

Cafeteria, Lighting a Plant 328
Church Lighting
  Contoured Pillar Ceiling 56
  Cove for a Tent-Type Church 20
  Gothic Highlighting 340
  Indirect Technique 650
  Portable Arrangement for Altar 623
  Quartz-Iodine Goes to Church 636
  Relighting on a Low Budget 344
  Stained Glass Windows 23
  Tent-Type Church 57
  Windowless Basilica 58
Circuit, Constant-Current Regulator Loading for Series Lighting 495
Classifying and Identifying Illuminating Engineers and Lighting Specialists 86
Classroom—Lighting a High-Ceiling Classroom 685
Classroom Television Viewing 323
Climate-Controlled Windowless Plant 308
Color in Seeing 553
Color Slides Without Gadgetry 116
Committee Activities, 1963 749
Compact-Arc Lamps, Control and Application of 5-kw 457
Constant-Current Regulator Loading for Series Lighting Circuits 495
Contoured Pillar Ceiling 56
Contrast Losses, Point-by-Point Prediction of 262
Control and Application of 5-kw Compact-Arc Lamps 457
Control Room—Vertical Lighting from an Indirect Cove 715
Correlating Ten-Foot Photometry 573, 736
Cove for a Tent-Type Church 20
Custom-Designed Lighting with Standard Equipment 286

D

Data Sheets
  Cafeteria, Plant 328
  Floodlighting a Building 139
  Floodlighting a Building and Sidewalk 433
  Gymnasium 521; 695
  High-Ceiling Classroom 685
  Indoor Tennis 705
  Load Dispatch Room 729
  Private Office 539; 745
  Stained Glass Windows 23
  Telephone Switchboard Room 551
  Windowless Gymnasium 607
  Livestock Auction Arena 500
  Office, General 493
  Plant Cafeteria 328
  Swimming Pool 638
  Used Car Lot 464
  Used Car Shopping Center 445
Design and Calibration of a Disability Glare Lens 120
Design and Evaluation of Dynamically Integrated Lighting-Air Conditioning Systems 75
Desk Tasks in Schools and Offices, Sight Lines to 244
Detection of Asymmetry and Flicker in Fluorescent Lamps 141
Detroit's 'Gas Building,' Illuminating Engineering Aspects of 654
Development of a New American Standard Practice for Roadway Lighting 594, 687
Dimming with Semiconductors, Fluorescent Lamp 312
Disability Glare Lens, Design and Calibration of 120
Dispatch Room, Lighting a Load 729
Doughnuts to Dollars 304
Dual Purpose–Lighting and Demonstration Drafting Room 300

E

Economic Floodlighting with Mercury Source 55
Editorial (Stepping Along) 295
Editorial (Reference Data on Reflected Glare) 159
Effectiveness Ratings for Roadway Lighting 501
Effect of Ballast Circuitry and Line Voltage Variations on Mercury Lamp Stability 447
Effect of Electrode Structure on Lamp Performance 440
Effect of Lighting System Geometry, Distribution and Polarization on Typical Pencil Tasks (abstract) 584
Effect of Mercury Vapor Pressure on Lamp Ionization 589, 731
Effect of Operating Position and Circuit Variations on Mercury Lamp Characteristics (abstract) 600
Effect of Radiant Ceilings on Fluorescent Ballast Operation 62
Electrode Structure, Effects of on Lamp Performance 440
Electroluminescence—An Appraisal of Its Short-Term Potential (abstract) 592
Electroluminescent Lighting in a 180-cps Package (abstract) 590
Engineer Examines Recruiting Practices 674
Engineered Period Lighting in the United States Capitol–East Front Extension 602, 665
Evaluating the Visual Significance of Reflected Glare, Recomended Engineering Application of the Method of 217

F

Facade—Quartz Applications 633
Fading Effects of Modern Light Sources on Modern Fabrics, Review of 578; 676
Fairbury, Illinois, Bank 53
Field Evaluation of Reflected Glare 250
Field Investigation of Flux Contrast—Small Offices (abstract) 587
Filament Lighting for Roadways, Evaluation of Sodium, Mercury and 28
Financial Statement, IES, 1963 750, 758, 762
Flicker in Fluorescent Lamps, Detection of Asymmetry and 141
Flight Apron—Oakland International Airport 624
Floodlighting
  Building 139
  Building and Sidewalk 433
  Mercury Sources, with 55
  Nighttime Impact 474
Fluorescent Applications, Uniformity of Illumination in 54
Fluorescent Lamp Dimming with Semiconductors 312
Fluorescent Lamps, Specialized External Coatings for 599; 723
Fluorescent Lamp Lumens—Rated and in Service 598, 697
